

Passwordless Identity Package

The 1Kosmos Passwordless Identity Program (PIP) allows your organization to start its journey towards passwordless authentication **risk-free**.

PACKAGED

1Kosmos packages the PIP, so your organization can buy all the planning, the integration and the 1,000 user licenses it needs for the first year.

ORGANIC ADOPTION

The 1Kosmos passwordless QR code is displayed on the same login page as your conventional username and password fields to give your workforce a choice when it's time to authenticate.

LICENSE FLEXIBILITY

As adoption accelerates and increases in volume, 1Kosmos adapts to the situation by not imposing any extra charges during the first year. In other words, 1Kosmos finances your adoption.

TARGET FLEXIBILITY

1Kosmos allows you to choose two target systems, so you can experience passwordless authentication. For example, Windows and SSO, or MacOS and remote connection. Your choice.

QUICK DEPLOYMENT

Time frame: 1 week, in and out, which represents a minimal investment of time.

PASSWORD RESET ASSURANCE

1Kosmos provides your employees a biometric reset feature. Going passwordless entails eliminating passwords and therefore forgetting them. So just in case a user needs to access an internal web resource that requires a password, 1Kosmos allows the user to reset that password to authenticate with much ease.

Passwordless Identity Package

Benefits across the board

By going passwordless

Go passwordless in 60 days or less for your key systems.

Eliminate credentials and help desk calls for your key systems.

Easy to deploy, easy to manage and frictionless for users.

Passwordless Identity Package

Try our passwordless authentication solution while keeping your existing authentication processes.

Focus first on the target system that is causing the most help-desk concerns.

One step at a time. We're here to assist you when it works for you.

Pricing

\$50,000
