

Workforce Passwordless Identity Package

Primary Goals

- Deploy the 1Kosmos BlockID Workforce platform
- Configure the workforce use cases for passwordless authentication for System 1 and System 2

Project Scope

1

Tenant Setup

- Setup tenant within the cloud
- Enable integration with decentralized data sources
- Setup admin accounts
- Setup directory configuration

2

Broker Deployment

- Deploy broker on up to 2 servers
- Configure SSL for broker interface
- Configure communication through web proxy, if required
- Configure broker to integrate with Active Directory (1 domain)
- Configure broker integration with the cloud tenant

Deliverable

- ✓ Broker configured across 2 systems and integrated with Active Directory

3

SAML Application Integration

- Exchange and import SAML metadata with SSO (or two SAML applications)
- Configure SAML Identity Provider response parameters.
- Configure Service Provider integration

Deliverable

- ✓ SAML application integrated with BID
- ✓ Functioning SAML authentication with QR code-based sign in

4

Testing

- Assist with testing of Active Directory & any 2 SAML Integrations
- Bug Fixes

Deliverable

- ✓ Assist with functional testing
- ✓ Bug Fixes
