## About 1Kosmos

### Mission Statement

At 1Kosmos, our mission is to establish BlockID as the preeminent identity platform globally, to provide “individuals” with secure digital identity controls, and “service providers” with powerful tools to defend against identity fraud while simplifying the user experience.

### About

1Kosmos BlockID is a distributed digital identity platform supporting both business-to-employee and business-to-consumer services that easily integrates with existing operating systems, applications, and IT security infrastructure to perform strong, verified identity-based authentication, eliminating the need for passwords, one-time codes, and more.

By simplifying identity infrastructure, 1Kosmos drives both cost savings and user convenience while securing businesses and individuals from the harm and inconvenience of identity fraud.
